EUROPEAN WORKSHOP ON CERAMIC MATRIX COMPOSITES:

INSIGHTS, INNOVATIONS, AND BEST PRACTICES

Following the successful inaugural edition in 2022, the event returns to welcome the Ceramic Matrix Composites community. It aims to bring together academic and industrial experts from across Europe to exchange perspectives, discuss the latest developments, and share best practices.

Over the course of two days, hosted by BSCCB, a world leader and innovator in automotive brake technology and one of the early supporters of the ACerS Italy Chapter, participants will have the opportunity to engage in discussions, explore the latest developments, and, most importantly, connect with one another.

We eagerly look forward to welcoming you!

Confirmed presentation:

Prof. Monica Ferraris - R&D on CMCs in Italy

Prof. Gerard Vignoles - R&D on CMCs in France

Prof. Dietmar Koch - R&D on CMCs in Germany

MARCH 31 [PM]-APRIL 1 [AM], 2025

Kilometro Rosso -Via Stezzano, 87 • Bergamo(BG)

The event is free open to all, until seats are filled.

All posters can compete for the best poster award.
