

BE PART OF BUILDING THE FUTURE!

We are looking to fill the following position with immediate effect:

PRODUCT DEVELOPMENT ENGINEER

RESPONSIBILITIES

- Drive the development of new products from initial concept to series production
- Continuously improve existing products and manufacturing processes
- Plan, manage, and execute development projects, including coordination with external partners
- Support prototype production and evaluate laboratory test results
- Collaborate closely with Application Engineering, Production, and Sales during product launches
- Assess the technical and commercial feasibility of new product ideas

REQUIREMENTS

- Degree in Composite Materials, Plastics Engineering, Materials Science, Chemistry, Textile Engineering, or a related field – or equivalent professional experience
- Solid knowledge of resin systems, materials, and additives
- Hands-on experience with material testing methods in a laboratory environment
- Proven success in product development, ideally in areas such as coatings, chemical modifications, or thermoplastic composites
- Strong communication skills in English (both written and verbal)
- Willingness to travel occasionally

Have we captured your interest?

Apply now! We look forward to getting to know you!
